Overview

Over a decade ago, founder Ross Mason created a short string of text that pioneered a simple, powerful idea: why crank out custom code over and over when it's faster and more efficient to assemble the right components.

Challenge

St. Mary's Axe is a historical building of great significance sitting amongst contemporary compatriots of the "Gherkin" and "The Shard". CCI were employed to facilitate the move of Mulesoft and their 150+ staff into their new city centre base.

Solution

CCI created a professional office space using glass partitioning with the specialist graphics to accentuate Mulesoft's quirky atmosphere. From a "gong" in the open plan office to meeting rooms called "the bat cave" and "Azkaban", CCI were able to put Mulesoft's stamp onto their project whilst keeping function at the forefront of our thinking.

"I have used Creative Commercial Interiors for two of our moves/office fitouts for office space in London, and have had excellent service, strong commitment and accuracy in achieving deadlines, but most importantly has always been there to ensure we were happy with the end result. "
