Overview

Rakuten, Inc. is a Japanese electronic commerce and online retailing company based in Tokyo. It was founded in 1997 by Japanese businessman Hiroshi Mikitani.

Rakuten took the opportunity to update their Belfast office space whilst all staff worked from home during the Covid pandemic. Their offices are located in a distinctive red brick warehouse style building in the heart of Belfast City.

Challenge

The Rakuten team felt they needed an update to their offices to include modern furniture solutions creating more space. The team wanted to use the natural light of the large old windows, and compliment them with glass, timber and steel framed industrial partitioning systems within the natural framework of the workplace.

Solution

CCI were able to blend the new with the old and create a unique work space for the team. We stripped back the years of dirt and grime from the old floor and revarnished and laquered it, bringing back its original splendor. The old walls and steel uprights are the perfect backdrop to CCI's contemporary furniture. The use of metal framed partitioning in the space adds private rooms and all in keeping with the style of the warehouse interior.
